

REMARKS

The Specification has been amended as indicated in the Request for Filing a Divisional Patent Application Under 37 CFR §1.53(b) submitted herewith to indicate that the instant Application is a division of U.S. Application Serial No. 09/828,911, filed April 10, 2001. The claims have been amended so as to retain original independent Claim 1 and add claims directed more specifically to the Group III claims reading on species III represented by Figure 3 of the instant Application.

It is contemplated that a Substitute Specification and a further amendment of claims will be presented in a Supplemental Preliminary Amendment in order to place the Application and claims in a language and formats which are more customary for U.S. patent applications. In addition, formal drawings will be submitted which are the same as the drawings in U.S. Patent No. 6,651,584, of which the instant Application is a division.

Respectfully submitted,

MASON, MASON & ALBRIGHT
